Solo de severa mineralização

## Quick-Trak

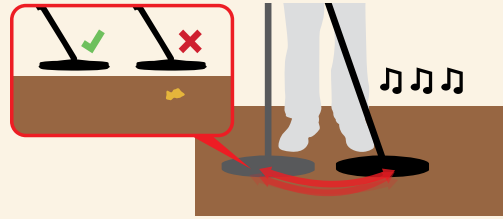

**1**

Keep coil close to ground  
Mantega la bobina cerca del suelo  
Mantenha a bobina próxima do solo

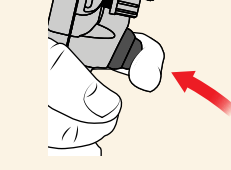

**2**

Sweep coil over one spot  
Barra la bobina sobre un lugar  
Passe a bobina sobre um local

**3**

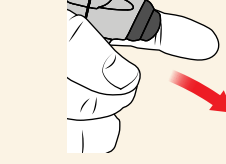

**4**

Sweep until audio is stable  
Barra hasta que el audio esté estable  
Passe a bobina até que o áudio seja estável

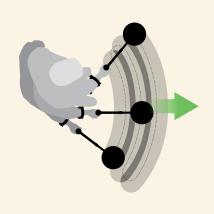

**5**

**6**

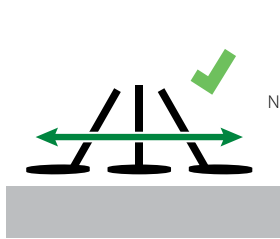

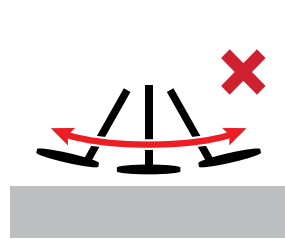

Start detecting  
Comience la detección  
Comece a detecção

## Detecting Basics

## Detección Básica

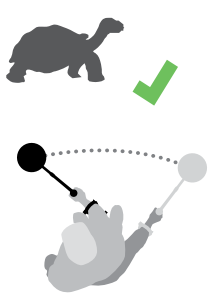

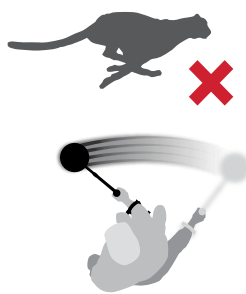

## Detecção Básica

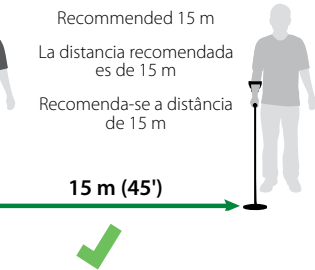

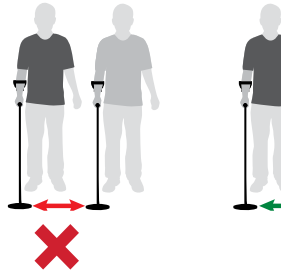

Sweep level  
Nivel del barrido  
Nível da varredura

Keep metal away from coil  
Mantenga los metales lejos de la bobina  
Mantenha metais afastados da bobina

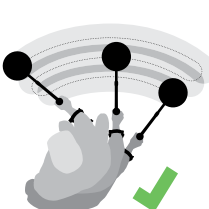

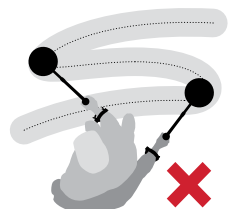

Sweep slowly  
Barra lentamente  
Varra lentamente

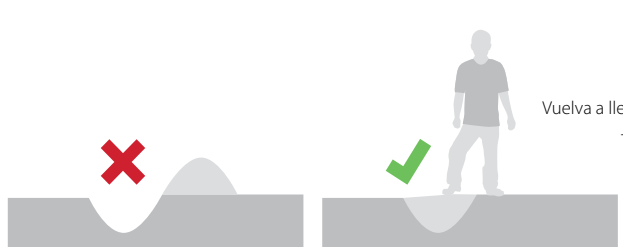

Recommended 15 m  
La distancia recomendada es de 15 m  
Recomenda-se a distância de 15 m

15 m (45')

Move apart  
Manténgase lejos de otros detectores  
Afaste-se de outros detectores

Overlap sweep  
Superposición del barrido  
Sobreponha a varredura

Refill hole  
Vuelva a llenar el agujero  
Tape o buraco
